

Corporate Profile: Protecting Access and Identity in the 21st Century

nAppliance Networks builds turnkey windows-based appliances for Network Security and Infrastructure. The nAppliance Net Gateway series provides customers a secure web gateway and secure remote access, while significantly reducing the cost of deploying these technologies on a familiar Windows platform. In addition, our Exchange Archiving appliance ensures compliance, mail server management, and e-discovery risk mitigation, on a Windows-based solution.

“nAppliance has deployments with some of the most demanding and secure networks in the world, including extensive deployments at facilities within the military and intelligence communities.” Billy Bath, VP of Business Development

Advantage

Multiply your Network to the Power of n

IT departments can now purchase a plug-and-play Microsoft Forefront based appliances to avoid a number of challenges encountered with software only, do-it yourself solutions. nAppliance alleviates many deployment and maintenance burdens, allowing the IT manager to reduce his TCO and operating costs.

- **Robust Turnkey Solutions:** Tuned for performance and security, our appliances are robust, turn-key solutions that greatly reduce deployment time and complexity, while increasing value and usability.
- **Value Added Integrations:** through it's proprietary "One-face" technology nAppliance Networks adds a variety of tools such as appliance management consoles, monitoring and diagnostics programs, and complex 3rd party integrations that make the nAppliance platform the clear platform of choice for deploying these technologies.
- **Forefront Security Experts:** Our staff includes a team of trained and certified Forefront security experts who are able to assist in the deployment, maintenance, and support of your appliance and Forefront architecture.

Comprehensive Solutions: Working closely with strategic partners, nAppliance ensures that its solutions have the breadth and depth of functions, ability to integrate seamlessly in the existing infrastructure and performance to provide the best appliances to meet today's demanding security needs.

Customers

We deliver return on your investment and help a range of business and enterprise customers

nAppliance works with organizations around the world, in nearly every industry, in the public and private sectors, from the SMB to the Fortune Global 500. Our customers include banks and other financial services firms, manufacturers, healthcare and life sciences organizations, Internet service and telecommunications providers, educational institutions, and public-sector agencies.

nAppliance provides technology, products, and services to customers in more than 20 countries. Our customers include some of the most respected names in business: Hitachi Medical, IRS, Bell Canada, Northrop Grumman, Lockheed Martin, Siemens, US Bank, Experian, and many others.

Strong leadership record

Our differentiated value comes from our sustained and substantial investment in R&D, broader portfolio of systems, software, and services, our ability to create total integrated solutions—all designed in partnership with Microsoft®—and our commitment to delivering the best Total Customer Experience in network security industry.

A global presence

Today, we employ people worldwide, more than 50 percent of whom work outside the U.S. We have large sales and service force focused on information infrastructure and network security, and we work closely with a global network of technology, outsourcing, systems integration, service, and distribution partners.

Channel Partners

Our partnerships include a global network of system integrators, value added distributors and resellers. We offer our partners extensive training and support through our Partner Program and Web site. We are a 100% channel company with a strong commitment to channel integrity.

Technology Partners

nAppliance and its partners create end-to-end industry-leading security solutions for our customers. Our partnership model gives us the ability to be flexible and respond to your specific needs, regardless of whether you are a global enterprise or small business. Our partner relationships help us create feature rich out-of-the-box solution and support model at a competitive cost. nAppliance partners include Microsoft, RSA, Cavium, Intel, Websense, Sonasoft and many others.
